

DigiGreet is a digital signing in system.

We have three levels Lite, Pro & Enterprise. Enterprise, certain features are dependent on the level you require, the following shows the list of features for full product (*Enterprise*).

Applications

It can be used in receptions to offer a smarter experience for visitors, staff or contractors.

Why use the system?

Compared to a paper based system, DigiGreet greatly reduces administration costs and time. It is easy to use with minimal training.

It is available with a "no hassle" set up for a monthly charge.

See who is on your premises at any time, you can also see times, frequency and a host of other useful information to help you manage the business.

How does it benefit the user?

It looks great and gives visitors a positive first impression.

It remembers you and can give you personalised reminders and messages on arrival and exit.

- Up and running in no time.
- GDPR Compliant.
- Communicate better with personal messages for visitors and staff.
- Look the part -use your Branding.
- Compliance -see who is on site 24/7.
- Flexible efficiency -multiple users at different entrances.
- Time Management -see contractors sign in and out.
- Built in fire drill check and history.

System Features

Monitoring - Real time reports on who is on the premises. In an emergency situation, everyone can be accounted for easily.

Branding - The main screen of DigiGreet can be customised to take on board your logos and colours.

Printing - You can print off branded visitor/ID badges (*Pro* with just logo or including photo of visitors *Enterprise*).

Fire log reports - DigiGreet allows you to take a register of all the people on site in a fire drill, keeping a log for health and safety purposes.

Health Safety - Have a pre-requisite questions or an agreement before a visitor can sign in, DigiGreet can take this into account.

Multi-Site - Manage visitors and staff across multiple sites

Staff and Visitors - Manage staff differently to visitors

Reporting - See key visit data such as contractor time sheets, daily visitor numbers and late arrivals

Fobs - Already have staff key fobs or cards, we can link them to DigiGreet. For visitors we can add a barcode to their badge so if they are popping out for some food they can tap out (*Pro/Enterprise*). Also, setup temporary fobs for Visitors (*Enterprise*)

Email Notifications- Waiting for a visitor to arrive, once they do our system can send you an email notification to let you know. (*Pro/Enterprise*)

Messages- If you like you could add a welcoming message for the day for visitors or a reminder for an event coming up when they are leaving.

Alerts- If staff member are not on site, our system can let the visitor know. (*Enterprise*)

Updates- We are always adding new useful features to DigiGreet, within *Enterprise* you will get access to these at no extra cost. (*Enterprise*)

Standout

What makes us different from other providers is we can adapt the system to meet your needs giving you better solutions. *

* Terms and conditions apply.
